

File Edit View Run Kernel Settings Help

         Code 

```
[4]: person_info = {  
      'name': 'John',  
      'age': 25,  
      'address': 'New York'  
    }  
    print("Person information:", person_info)
```

Person information: {'name': 'John', 'age': 25, 'address': 'New York'}

```
[5]: person_info['phone'] = '1234567890'  
    print("Updated person information:", person_info)
```

Updated person information: {'name': 'John', 'age': 25, 'address': 'New York', 'phone': '1234567890'}

```
[6]: my_set = {1, 2, 3, 4, 5}  
    print("Set:", my_set)
```

Set: {1, 2, 3, 4, 5}

```
[7]: my_set.add(6)  
    print("Updated set:", my_set)
```

Updated set: {1, 2, 3, 4, 5, 6}

```
[8]: my_set.discard(3)  
    print("Set after discarding 3:", my_set)
```
